This program is the continuation of the long line of outstanding geology field trips sponsored by the Association. This program is co-sponsored by the Northeast Nebraska RC & D Council and supported by the Lower Elkhorn NRD and the Lewis & Clark NRD. This one-day bus tour will start off with a discussion of the Wau-Col Regional Water System (review on hydrogeology, putting system together, engineering, financing, decommissioning and handling of existing systems, and the system operation.) We will then travel to Ponca State Park where we will have lunch and discuss the geothermal systems in the Park as well as site selections and geothermal systems options for other locations.

Registrants will receive lodging options and tour times closer to event.
