Do not contaminate!!

When haulers or centers ask that items be clean or sorted in a certain way, **FOLLOW their requests.**

Failure to follow contaminates whole containers.

Generally, means ALL will go to the landfill--

Nothing Recycled!

Re-Soiled??

Anything from a plant can go back into the ground. = **Re-soiled.** Paper, cardboard, veggies & fruit, leftovers, grass clippings, tree trimmings, etc. Add the raw materials or compost to enrich yard, garden, pasture or field.

20% of all methane emissions are from landfills. Compostable materials release methane.

Zero Waste Swaps

What if you find items that you can use in place of items that would have gone to the landfill, for example: SWAP plastic storage containers for air tight stainless steel containers.

Examples:

<http://zerowastememoirs.com/15-easy-zero-waste-swaps/>

<https://www.goingzerowaste.com/blog/the-ultimate-list-of-zero-waste-swaps>

Reduce, reuse, recycle, re-soil or proper disposal of...
